LET PEOPLE CHOOSE **CALLME**:  
*a further reason to count on your professional skills.*

# THE VIDEO DOOR PHONES OF ALL YOUR CUSTOMERS ARE READY FOR **CALLME**

**EASY TO USE FOR YOUR CUSTOMERS**

**EASY TO INSTALL**

**Install it now!**

From the Urmet technology the solution that your customers are looking for.

CallMe is the video door phone device allowing you to see who is ringing the doorbell and to open the door directly from your smartphone or tablet.

## CALLME: EASY LIFE FOR EVERYBODY.

### Easy to use for your customers.

Simply download the free app for Android or iOS. CallMe is ready to use, at any time and in any place. Simple, quick, safe: go out with the maximum peace of mind and be always connected to home.

### Easy to install.

- ✓ CallMe is compatible with **all Urmet door phones and video door phones - even audio** - of the 2Voice range, 4+N analogue and coaxial, as well as kits 1722.
- ✓ The device can be installed on the **DIN panel** or on the **wall** using the special **wall-mounting kit**: extremely compact with no need to make any work on the wall.
- ✓ It can be installed in the apartments **without any intervention inside the riser**: the single dweller makes his decision.
- ✓ It does not require any additional power supply up to **12 indoor stations**.
- ✓ It also allows forwarding a call to up to **4 different mobile devices** and offers the possibility to make intercom calls.
- ✓ **Adsl** connection through Wi-Fi or network cable.
- ✓ Several **CallMe** devices can be managed with a single smartphone (beach house, country house, parents' flat, office...)

## WHY CHOOSING CALLME

COMPATIBLE WITH ALL 2VOICE INDOOR STATIONS, KITS 1722/81, 1722/83, 1722/85 AND 4+N ANALOGUE AND COAXIAL SYSTEMS

IT DOES NOT REQUIRE THE REPLACEMENT OF THE OLD DOOR PHONE OR VIDEO DOOR PHONE

IT ALLOWS FORWARDING THE CALL TO UP TO 4 MOBILE DEVICES

IT ALLOWS INTERCOM CALLS TOWARDS THE MOBILE DEVICE

IT ALSO FEATURES A RJ45 PORT FOR WIRED CONNECTION AS AN ALTERNATIVE TO WI-FI CONNECTION

### SET

two time ranges for the automatic switching off of the Wi-Fi, so as to reduce the electromagnetic pollution.

### DEFINE

the quality of video signal based on connection speed. It works also with low-quality signal networks (from 300 Kbps)

### CONFIGURE

call reception only when you are Wi-Fi-connected, thus saving on data traffic.

Available for Android and iOS
